Sahara, Inc.
801 North 500 West, Suite 300
Bountiful, Utah 84010

To Whom It May Concern,

The Tooele County Detention Center was constructed by Sahara, Inc. in 2011. It took a huge amount of teamwork at all levels to design and construct this project from beginning to end in barely 12 months. To take this project from site selection to ready for occupancy in 12 months is something that many in the process did not think could happen. We found that enough good people pulling for a common goal can produce amazing results. Simply put, we had the right team in place.

Sahara was a true partner throughout the entire process. The project was completed using a design/build delivery method. Sahara delivered the project when they said they would and kept to the budget that was set at the beginning. In fact, Sahara was able to help us create a much higher quality facility than we originally anticipated, while staying within the same budget constraints. There were some changes along the way, but these were due to owner changes and additions. Sahara's employees were professional, knowledgeable and easy to work with. In fact, I'm looking forward to working with this same team on future projects.

I believe that this new facility is a great asset to Tooele County. The building, as well as the construction process, exceeded my expectations. I would definitely recommend Sahara as a qualified and competent design/build contractor. Please feel free to call me at 760.917.3691 if you'd like additional information.

Sincerely,

Leo Mantas, Managing Director
